Location: Berkeley, California, USA
Email: kchan9196@gmail.com | Phone: (510)730-1589

Education

University of California, Berkeley — Berkeley, California, USA
Expected Doctor of Philosophy in Chemical and Biomolecular Engineering — *Aug 2019 – Present*
Overall GPA: 3.92/4.0 (4th Year)
Additional coursework listed under Technical Strengths

Georgia Institute of Technology — Atlanta, Georgia, USA
Bachelor of Science in Chemical and Biomolecular Engineering — *Aug 2014 – May 2018*
Minor in Scientific & Engineering Computing (SEC) *coursework listed under Technical Strengths*
Overall GPA: 3.79/4.0

Research Experience

NASA Ames Research Center — Jan 2023 – Present
Pathways Intern – Dr. William J. Coupe — *Mountain View, California, USA*

- Research in machine learning methods for predicting network-level delays to inform decision making during scheduling in air traffic management systems

University of California, Berkeley — Jan 2020 – Present
Graduate Research Assistant – Prof. Ali Mesbah — *Berkeley, California, USA*

- Research in machine learning methods for optimal control and statistical forecasting for cold atmospheric plasmas in biomedical applications
- Co-developed a correction strategy for deep neural network-based controllers in complex, nonlinear systems on embedded hardware, resulting in Publication 1
- Created an end-to-end framework for optimal hyperparameter search for embedded learning-based control using multi-objective Bayesian optimization, resulting in Publication 7
- Continuing work on personalizing plasma treatments using transfer learning and active learning paradigms, resulting in Publications 5, 6

Georgia Institute of Technology — Jan 2017 – May 2018
Undergraduate Research Assistant — *Atlanta, Georgia, USA*

- Simulated experimental models using COMSOL Multiphysics Software to observe transport properties of fluids in porous and reacting media
- Participated in discussion of theoretical applications of metamaterials and nanoscale thermal transport properties

Teaching Experience

University of California, Berkeley - College of Chemistry — Spring 2020, Spring 2021
Graduate Student Instructor – Prof. Jay D. Keasling — *Berkeley, California, USA*

- Worked on a team of 3 to run a process controls and dynamics course (CBE 162) of 60-70 students
- Obtained above average ratings on all aspects of student course evaluations by teaching weekly labs, holding weekly office hours, managing a discussion forum, developing interactive lab assignments, and grading exams

University of California, Berkeley - College of Chemistry — Fall 2019
Graduate Student Instructor – Dr. Negar Beheshti Pour — *Berkeley, California, USA*

- Worked with a team of 8 to run an introductory chemical engineering course (CBE 40) of 62 students

- Obtained above average ratings on all aspects of student course evaluations by holding weekly office hours, managing a discussion forum, developing and grading assignments and assessments

Georgia Institute of Technology - Center for Academic Success Aug 2016 – May 2018
Peer Mentor/Tutor *Atlanta, Georgia, USA*

- Coached more than 50 students one-on-one in several subjects including Chemistry, Chemical Engineering, Computer Science, and Math

Georgia Institute of Technology - School of Physics Aug 2015 – May 2018
Undergraduate Teaching Assistant *Atlanta, Georgia, USA*

- Obtained above average ratings on all aspects of student course evaluations by guiding students on hands-on lab assignments, revising existing coding assignments, and mentoring new hires

Technical Strengths

Programming Languages : Python, MATLAB, LaTeX, C, Java

Additional PhD Coursework: Introduction to Machine Learning; Experiential Advanced Control Design I; Deep Reinforcement Learning, Decision Making, and Control

SEC Coursework: Intro to Object-Oriented Programming; Computational Problem Solving; Numerical Analysis; Mathematical Methods in Engineering; High Performance Computing

Publications

7. **K. J. Chan**, J. A. Paulson, and A. Mesbah, "A multi-objective learning framework for optimal hardware-software co-design in MPC-on-a-chip systems: An application to cold atmospheric plasmas," *To be submitted to IEEE Transactions on Control Systems Technology*.
6. **K. J. Chan**, J. A. Paulson, and A. Mesbah, "Safe explorative Bayesian optimization – Towards personalized treatments in plasma medicine," *Submitted to the 62nd Conference on Decision and Control*.

† denotes equal contribution among authors

Service/Outreach/Mentorship

University of California, Berkeley Aug 2020 – Present
Research Mentor *Berkeley, California, USA*

- Kelci Skinner, Undergraduate student in Chemical and Biomolecular Engineering (August 2022 – Present)

- Shawn Shin, Undergraduate student in Physics (February 2021 – June 2021)
- Mehul Raheja, Undergraduate student in Electrical Engineering and Computer Sciences (May 2020 – May 2021)

Graduate Women in Engineering Aug 2019 – Present
Member, Mentor Buddy *Berkeley, California, USA*

- Served as a “buddy" to mentor and aid a running total of 4 first-year members begin their programs at UC Berkeley; met on a minimum biweekly basis or as-needed

Graduate Student Advisory Committee Jun 2020 – May 2021
Special Projects Webmaster *Berkeley, California, USA*

- Headed special projects involving technical improvements to graduate-student-led programs in the Department of Chemical and Biomolecular Engineering
- Coordinated the development of a web-based solution to connect a running total of 27 undergraduate students with research projects within the department
- Created a communication network of 30-40 students to foster inclusion and discussion with the Asian American and Pacific Islander community within the department

Selected Honors/Awards

- ACC Student Travel Grant, 2023
- Outstanding Graduate Student Instructor, Fall 2019, Spring 2022
- Graduate Remote Instruction Innovations Fellow, 2021
- Departmental Fellowship by Tom De Jonghe, 2021
- Women in Chemical Engineering (WIC) Travel Award, 2020 *(virtual conference)*

Presentations
